REFERENCE NO: NR024

DATE RELEASED: 6<sup>th</sup> August 2007

## **XCEL book \$600,000 in orders for Eurofighter Typhoon Programme**

XCEL Power Systems Ltd announced today that they have received further purchase orders for Eurofighter Typhoon Tranche 2 power supply products worth over \$600,000.

The orders will cover additional production requirements for Tranche 2 spares and export contracts, for the XCEL power supply designs used on the Defensive Aids Sub System (DASS) suite of Electronic Warfare products fitted to the Typhoon. A further release of orders worth over \$200,000 is expected to be placed with XCEL in the near future.

Commenting on the latest orders, **Richard Weller**, Managing Director of XCEL Power Systems Ltd, stated "Our support for the Eurofighter Typhoon programme is a key focus of our long term strategy. While these orders are for much smaller quantities than the main Tranche 2 production requirement, they still provide a significant boost to the shipments programme though 2007 and 2008."
