

MECHANICAL DESIGN ENGINEER

REPORTING TO

Chief Mechanical Engineer.

LOCATION

Ashford, Kent.

MARKET

Power Supplies and Build-to-Print Services for military, avionic and niche industrial products.

THE ROLE

To join our Engineering Team in the development of custom power supplies mainly for military and aerospace applications.

Working in a small team, the prime responsibility will be for the design of electronic enclosures and the creation of configured manufacturing Drawing Sets using Autodesk Solid Modelling software.

SKILLS, EXPERIENCE AND QUALIFICATIONS

- At least 2 years experience in electronic packaging.
- Familiarity with thermal analysis techniques.
- Qualified to HNC or degree standard in a relevant engineering course.
- Experience in design of test jigs, fixtures and mould tools for encapsulated components would be advantageous.
