## **XCEL SECURE ADDITIONAL ORDERS FOR EUROFIGHTER PROGRAMME**

As a result of German re-entry into the EFA programme, XCEL Power Systems have increased the total build quantity of their existing supply contract with BAE Systems. The contract additions total are valued at approx \$380,000 and the products will be manufactured and delivered within the existing EFA programme dates.

Richard Weller, General Manager of XCEL Power Systems Ltd, stated "We were delighted receive confirmation from BAE Systems of the German re-entry to EFA, and pleased to be able to accommodate the increased requirement within the original timescales".

Graham Jefferies, Executive Vice President of Microtel International Inc, stated "Germany was one of the original members of the EFA consortium and their decision to re-enter the program provides additional opportunities for our electronic components group. The EFA Typhoon programme has given the company valuable experience and an early advantage in developing Power Systems to meet the more demanding environment of the new breed of multi-role aircraft."
